Hazardous Weather

Hazardous Weather

A few light showers may persist through daybreak, mainly in the Big Country and Heartland. A slight chance of showers and thunderstorms then returns this afternoon. Mostly cloudy this morning. While cloudiness will persist in the Big Country this afternoon, the sun will return in the Concho Valley and areas southward. High will be in the upper 80s in the Big Country with 90s to the south.

Take caution if spending time outside today. Heat index values will make temperatures feel like 110+ degrees this afternoon! Stay hydrated!

Hazardous Weather

Clusters of on and off showers and thunderstorms will occur today across North and Central Texas. Locally heavy rainfall and frequent lightning will be the main threats with any storms. Additional storms are expected to develop this afternoon and again overnight tonight.

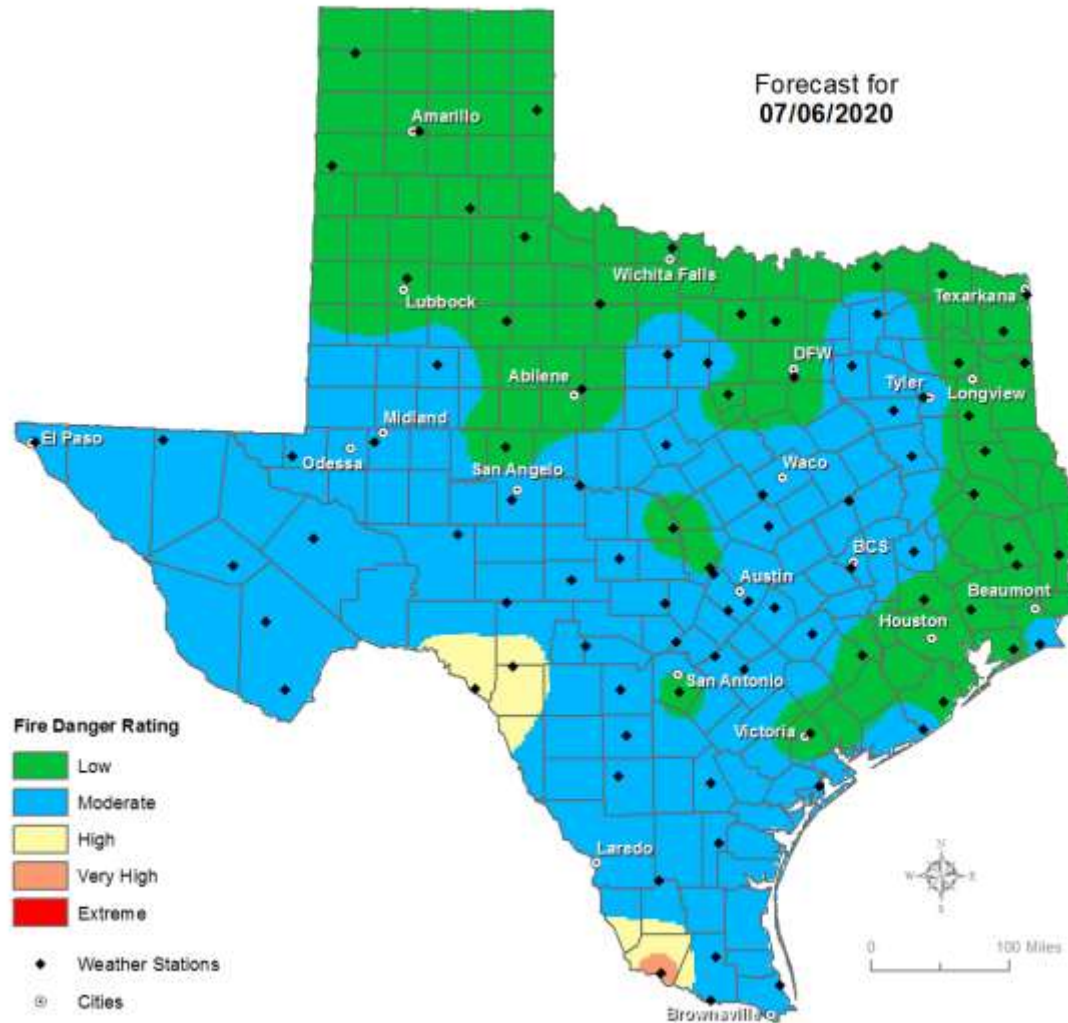

Temperatures will be a bit closer to normal today across Southeast New Mexico and West Texas. Thunderstorms are also possible once again across the higher terrain to the west as well as across the Western Low Rolling Plains, though the best opportunity for storms looks to be across the Davis Mountains and Marfa Plateau. Severe weather is not expected, though storms could produce heavy rain, small hail, gusty winds, and frequent lightning.

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
